DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, 8-11, 14, 15, drawn to a cathode comprising a catalyst and two layers each containing an organic polymer, classified in class 429, subclass 40.
 - II. Claims 16-20, drawn to a method of making a cathode comprising combining carbon with AgMnO_4 , classified in class 429, subclass 231.8.
 - III. Claims 21-23, drawn to a cathode comprising manganese and silver, classified in class 429, subclass 224.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together and have different effects such that Invention II requires a cathode comprising carbon versus Invention I requires a cathode having a catalyst and two layers each comprising an organic polymer but does not require carbon versus Invention III requires a cathode comprising manganese and silver but does not require an organic polymer (Invention I) nor requires a cathode comprising a carbon (Invention II).

Art Unit: 1745

3. Inventions II and I, III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make other and materially different product such as a cathode comprising carbon and AgMnO₄ whereas the product of Group I does not include carbon but instead comprises an organic polymer and Group III does not require carbon.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Tu Nguyen on March 24, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laura S Weiner whose telephone number is 571-272-1294. The examiner can normally be reached on M-F (6:30-4:00).
